

Volume IV · Chapter 20 — Structuring, Provenance & Building the Corpus · Labs

Source: split from `med-tech-curriculum-V1.md` (V1). From this split onward this chapter is maintained **independently** here. See `Volume-IV-Chapter-20-context.md` for the AI interaction log.

Prerequisites: Ch 18, Ch 19.

Learning outcomes — the student can: semantically chunk book content; attach citations/provenance; build a versioned, updatable knowledge base; manage licensing/governance of sources.

Labs (hands-on) — 12 h:

#	Lab	h
20a	Build a semantic chunker with citation metadata	4
20b	Assemble a versioned knowledge base (text + figures)	4
20c	Implement citation-traceable retrieval (answer → source page)	4

Datasets/tools: vector DB; chunking libraries; a metadata store. **Assessment:** cited knowledge base (60%); provenance audit (20%); quiz (20%). **Key decisions:** chunk granularity; provenance schema; licensing compliance; update strategy. **References:** plan §6; §13 → RAG.... **Hours:** Theory 6 + Lab 12 = 18.
